

“If it is new to you and being utilised to improve the construction product or process, then that is innovation.”

innovation-site is a rapidly expanding timber frame construction company, carpentry sub-contractor and partner of choice for leading manufacturers and building companies.

Who are we?

We are specialist timber frame erectors of buildings across a range of UK sectors, including housing and flats, self build, nursing home, travel lodges and specialist constructions. Based in Bedfordshire but working nationwide, with over 25 years' timber frame construction and carpentry contracting experience we have all the skills you need to achieve your goals.

Sustainable construction

Whether you are a developer, contractor, architect or self-builder, you will know that building regulations are demanding ever greater thermal insulation, sustainable materials and low impact building methods. As timber frame erectors, our green credentials and fast track production contribute to a future of sustainable communities. Innovation On-Site will enable you to realise your construction goals and to ensure that you enjoy your building for life.

Quality assured for your peace of mind

So that you can choose Innovation On-Site with total confidence, we are members of CHAS and the UK Timber Frame Association (UKTFA) Q-Mark scheme. The scheme provides an independent benchmark for UK suppliers, manufacturers, designers and erectors of timber frame structures. It demonstrates that we're competent, reliable and have an excellent track record in design, manufacturing, erection and supply.

Keeping everyone safe and healthy on-site

Innovation On-Site take the protection of our workers, clients and members of the public extremely seriously. We work within the strict guidelines of the Health and Safety code of practice and conduct thorough health and safety tests, site specific inductions and tool box talks. We also ensure that all team members are CSCS qualified and supplied with suitable personal protective equipment. Your project will be delivered on time, every time, without ever compromising the well being of anyone on your site.

Near zero carbon buildings for life

Timber construction is best known for its environmental excellence. With good reason too. It is organic, non-toxic and naturally renewable. Increases in demand for timber results in more forests and more forests mean less CO₂ omissions. Sustainable construction also makes for sustainable communities in places where people will enjoy living today and for years to come.

As a forward thinking company our customers benefit from state-of-the-art skills, thinking and technology. You can enjoy peace of mind knowing that you're working with the very highest calibre of construction contractors which you will find reflects in the superior standard of our work. We are accredited by key industry bodies, so be assured of our ethics, honesty and reliability. Courteous and professional, our highly qualified team delivers a meticulous standard of customer care every time.
